ENVIRONMENTAL POLICY

Friends of Cardiff Reservoirs Charitable Incorporated Organisation (CIO) recognises that all our activities have environmental impacts.

The CIO exists to assist in the protection, conservation, enhancement and, where appropriate, restoration of some historical parts of the Reservoirs as a safe and accessible place of recreation, education and enjoyment for the long-term benefit of all sections of the community.

Our organisation's own activities can also have a role to play in protecting the environment and can make a difference. Trustees will consider the effects of all our activities on the local and global environment. We will develop practical initiatives to realise the policy and will inform and encourage our members and volunteers to engage with the CIO in an environmentally sustainable way.

We will:

1. comply with relevant environmental legislation and regulations, and the principles set out by National Resources Wales for the management of the site
2. endeavour to reduce the overall environmental impact of activities, including purchases;
3. involve members and volunteers in our environmental programmes;
4. encourage good practice such as green transport and the re-cycling of equipment and materials; and

The CIO Trustees will review the content and appropriateness of the policy at least every 3 years.

Approved byTrustees: October 2026

Next review: October 2029
